## ***Policy on Player Releases and Transfers for Select and Rec Clubs***

### **Recreational Clubs**

#### **I. Player Drops, Transfers, and Additions to Rosters**

- Recreational Club Registrars have the authority to drop, transfer, and add players (recreational only) to rosters in the League One registration program.

### **Select Clubs**

#### **II. Player Release (Drop)**

- When a player wishes to be released from his/her current team, the KYSA Player Release Form must be properly filled out with all signatures and submitted to the state office for approval.
- Once approved, the state office will then drop the player from the roster in League One, and file the release form in the appropriate member organization file.
- The club registrar may then go into League One and print a new roster for the team.

#### **III. Player Transfer between two clubs**

- When a player wishes to be transferred to another club, the KYSA Player Release Form must be properly filled out with all signatures and submitted to the state office for approval.
- Once approved, the state office will then transfer the player to the new team in League One, and file the release form in the appropriate member organization file.
- Each club registrar may then go into League One and print out a new roster for the team(s) involved.
- ***IMPORTANT: Read the policy on player transfers and transfer windows in our state rules for recreational and select players.***

#### **IV. Player Transfer within the same club**

- When a player wishes to transfer to another team in the same club, or from recreational to select or vice versa in the same club, a local club registrar may perform this transfer in League One.
- The club registrar may then go into League One and print out a new roster for the team(s) involved.
- The KYSA Player Release Form is not necessary for transfers within the same club. League One will track those transfers.
