

ADULT PLAYER REGISTRATION – FOR CLUB ADMINS

The new “Adult Participants” risk requirements are a national requirement that all members of U.S. Soccer must implement by January 1, 2022.

“Adult Athletes” (defined as “Adult Participants”) are athletes who are 18 years of age or older who have regular contact participating on teams with “Minor Athletes” (this includes, but is not limited to training, scrimmages, games, etc.). “Adult Athletes” must complete a background check (valid for two years) and the annual Safe Sport training.

For Club Administrators:

Step 1: Club administrators will self-report their player as an “Adult Athlete” on the roster in the state system. Navigate to the team roster and click the blue edit button. There will be a popup with a dropdown bar, change the status to **Adult Athlete** and click save.

Step 2: When the background check and Safe Sport training have been completed by the “Adult Athlete”, KY Youth Soccer will update their “Adult Athlete” status to Risk Verified on the roster in the state system.

Step 3: The club will then be able to print the roster with the player included and the player’s card.

Please note: If a player turns 18 mid-season, that the club will need to mark their account as an adult athlete at the time. The adult athlete will then need to complete the background check and SafeSport training. PLEASE REMEMBER, players should only complete this process once they turn 18.
